

Welcome to JHAVÉ Client 2.0

As this software is still in beta testing, please feel free to e-mail us with any problems you run into.

Keep checking <http://jhave.org> for updates. If you are using Webstart to launch your client, these updates will be deployed "automagically" each time you start your client.

How do I use JHAVÉ?

Using JHAVÉ is as simple as following the directions in the panel below! Make sure the server and category are correct for your class and connect to the server. Once connected, please select a

Select Algorithm Input

Booth's Multiplication Input

Let's Learn Booth's Multiplication
Please enter the numbers you wish to multiply

	Decimal	Two's Complement Binary
Multiplicand	<input type="text" value="11"/>	<input type="text" value="001011"/>
Multiplier	<input type="text" value="23"/>	<input type="text" value="010111"/>
Select how many bits to use:	<input type="text" value="Automatic"/>	<input type="text"/>
<input type="button" value="OK"/>		<input type="button" value="Cancel"/>

Algorithm Selection

1. Select Algorithm
2. Create new data or use last algorithms data
3. Load Visualizer
