

Welcome to JHAVÉ Client 2.0

As this software is still in beta testing, please feel free to e-mail us with any problems you run into.

Keep checking <http://jhave.org> for updates. If you are using Webstart to launch your client, these updates will be deployed "automagically" each time you start your client.

How do I use JHAVÉ?

Using JHAVÉ is as simple as following the directions in the panel below! Make sure the server and category are correct for your class and connect to the server. Once connected, please select an algorithm, click *visualizeem>*, and, if needed, select or create the dataset that will provide input to the algorithm. It's that easy!
